GENERAL

MIMIC PLUS ADVERTISER

Mimic PLUS Advertiser

Now available a revenue generating program which displays text and graphics on an LCD screen. The system includes a radio interface which receives the signal from the scoreboard control console. MIMIC+ has a host of features to keep everyone informed.

Screen areas

The screen is split into three sections:

TEXT BAR

G
R
A
P
H
I
C

Operation

The Top text bar is available to scroll your messages, announcements and optional time and date display. Up to 20 messages are played in sequence and can be changed as required. The pre-programmed graphics and adverts are displayed in the central area in sequence. We can create these or convert existing artworks for you.

Whilst the console is being used the radio module picks up its transmissions and updates the score. The bottom line presents a summary of the current situation when a match is in progress, so that the score can be seen at a glance. The program tracks events and at the end of the over/innings, or if a wicket should fall, the display sequence is interrupted and a complete scoreboard mimic is shown.

So why not show the score and more at your club - for further details please contact us now:
